Box Mara is an online tool that helps manage project dependencies. What this means is that by creating a Box Mara configuration (or "box"), you create a list of all the that the projects in your Box Mara configuration depend on. It's easy to see which projects are complete, which still need work, what has updated recently, and what needs updating soon. The current version of Box Mara is v1.8! Check out more info on the latest updates below: Box Mara 1. 8 is a huge update! One of the most exciting changes in this update is the ability to search your box's contents by keyword, tags or project name. Also, you can now add a note to a specific commit in a project for more info on that commit. Dependencies: Box Mara includes projects from the following sources:

Features:

Download Box Mara here! https://github.com/railsware/box_marerails_app/blob/master/README.md or get more info on the website here: http://apurba-railsware.com/boxmara/. ARTICLE END
